
9.10.2.0 READY Position

At the moment the athlete calls and until the target (s) appears, the athlete must stand in the READY position with:

a) Both feet entirely within the shooting station boundaries;

b) Holding the gun with both hands;

c) The gun stock in contact with body; and

d) The toe of the stock on or better the ISSF official marker tape and clearly visible to the Referee standing in the correct position.

9.10.4 Marker Tape

To aid the Referee in controlling the position of the gun **the ISSF official marker tape** must be permanently affixed to the shooting vest (outer garment).

9.10.4.1 The ISSF official marker tape must be:

a) 250mm long, 30 mm wide, yellow in color with a black border and bearing the ISSF logo; and

b) Permanently affixed to the appropriate side of the shooting vest.

9.10.4.2 Marker Tape Check

It is the Referee's responsibility for ensuring that the marker tape is correctly positioned at the start of a stations. The Jury will provide an equipment control (verification) service that is available to all athletes starting on the first Pre-Event Training day and continue until the last day of the competition, including the days of competition. To ensure compliance with ISSF Rules, the Jury will conduct random checks during Competition and any athlete found to be in violation of the rules must be disqualified (see 9.4.7.1).

9.10.4.3 The correct position of the marker tape must be checked as follows:

a) All parts of the shooting vest must be empty;

b) The athlete must stand straight (erect) while holding the right arm (right-handed shooter) or left arm (left-handed shooter) in the shooting position, the upper arm horizontal and the upper arm vertical. The right angle position of the shooting arm will then be fixed with the use of a special accessory (see illustration);

c) The Jury member will then project a horizontal laser beam onto the marker tape to ensure the location of the point of the elbow in relation to the tape;

d) The laser beam must project onto the top half of the marker tape or higher to the tape;

e) An ISSF seal must then be placed on either end of the marker tape;

f) All illegal markers will be required to be properly positioned and subjected to re-check before the athlete is permitted to compete; and

g) Shooting vests must not be constructed with any dent (tips, dreaming, stretch, bend, etc.) that could be used to adjust the fit of the jacket.

Nú er Íslandsmótið í SKEET framundan en það verður haldið á skotvöllum okkar á Álfsnesi 18.-19.ágúst n.k. Yfirdómari mótsins verður á skotsvæðinu dagana 16. og 17.ágúst kl.18-21 og verður með búnaðarskoðun, m.a. mælir hann rétta staðsetningu á hæðarborðanum samkvæmt nýjustu reglum.

Við minnum keppendur á að koma skráningum sínum á mótið til sinna félaga, en félögin safna skráningum saman og senda til STÍ og mótshaldara, SR. Lokafrestur fyrir félögin er að kvöldi þriðjudagsins 14.ágúst.
